

Providing Access to Information

Why is the policy needed? How may the policy's effectiveness be measured?

In support of the school's purpose, access to a quality school library resource centre program, which facilitates the achievement of the desirable student outcomes, shall be available to all students.

The effectiveness of the library resource centre in meeting this aim will be determined by the extent to which:

the library resource centre services are efficiently managed according to recognised library procedures both within the resource centre and the school as a whole.

What will be done?

Who will be responsible?

How will it be done?

Evaluation
